Help U Sell Health Program (HUSH)

The Help U Sell model was designed for brokers who want to learn how to sell group medical and ancillary products. It is our goal to help flatten the learning curve by sending one of our experienced representatives along with you on a few sales presentations and enrollments to help you get started.

We will be there to answer all client questions and will instruct you on the guidelines involved in the submission of applications and enrollment materials.

While we assist in the sale, you are the point of contact for your clients. But, you have the confidence that, if you are in need, we are ready & willing to help.

You will be licensed directly with the insurance carrier and receive 100% of payable producer commission.

This is a great way to learn the group insurance business without feeling the pressure of having to be an expert.
